Waste Management Policy

J.D. National B.Ed. College practices a systematic waste management and recycling policy. The college encourages teachers, students, and staff members to practice a high level of cleanliness and hygiene.

The campus has plenty of greenery and all staff and teachers work towards beautification of our green campus.

- Waste is segregated and disposed.
- We have a rain water harvesting system installed in the campus.
- Students maintain a kitchen and herbal garden.
- Regular plantation drives are held on campus.
- All classrooms and common rooms carry a "Save Energy Turn off lights after use" sticker. This ensures that everyone switches off lights after use to save electricity.
- Annual workshops are held to teach students to create TLM out of waste materials
- Kitchen waste and dry leaves are collected in the compost pit to make manure, which is used back to tend to the college garden.
- Benchmarking the campus using the green norms.
